![CartoPac®]

Pipeline Inspection, Repair, and Maintenance (IRM)

Robust data collection for the operations and maintenance lifecycle of your pipeline assets.

Part of the CartoPac Digtial Pipeline Asset Management Platform, CartoPac IRM is a pre-configured workflow enabling energy and utility companies to record critical data throughout their asset operations and maintenance lifecycle.

FAST & FLEXIBLE DEPLOYMENT

Deploy quickly in an existing CartoPac or PCS environment, or choose a hosted or on-premise solution for new customers.

SEAMLESS INTEGRATION & TRACKING

Connect with work order systems, GIS, and asset management platforms while digitally tracking maintenance, inspections, and repairs in one system.

IMPROVED ACCURACY & EFFICIENCY

Leverage high-precision GPS and real-time validation to eliminate paperwork, reduce errors, and streamline field workflows.

SMARTER COMPLIANCE & DECISIONS

Automate compliance reporting, reduce regulatory risks, and gain real-time insights for faster, data-driven decisions.

Simplify your pipeline operations, compliance, and integrity management with CartoPac IRM.

CARTOPAC OVERVIEW

DIGITAL PIPELINE ASSET MANAGEMENT

CartoPac is an enterprise mobile GIS pipeline asset management platform delivering the most accurate, complete field data to support your digital transformation and integrity management objectives.

SYSTEMS OF RECORD

ArcGIS · SAP · MATERIALS · PCS™ Compliance

CartoPac® SERVER | HOSTED INTEGRATIONS STAGING

Microsoft SQL Server SSIS · FME by Safe Software · esri · ADO .Net

PODS Pipeline Open Data Standard · esri UPDM

MOBILE

iOS · Windows

> 66 *The most complete, most accurate data that we've ever received back from a mobile application.*
> —*CartoPac User*

THE CARTOPAC PLATFORM

Mobile. Seamless field data collection on Windows and iOS devices with sub-meter to sub-decimeter spatial accuracy.

Server. Enables centralized, real-time data visualization, seamlessly connecting field and back-office operations.

Workflow Manager. Quality control that ensures highly accurate data prior to GIS and system of record integration .

Studio. Intelligent form configuration enabling us to create complex workflows customized to your requirements without software development.

Hosted. Relieves your IT burden—we manage your asset management hardware, infrastructure, data, and user security.

BACKED BY TOTAL PRIORITY SUPPORT ➡

EXPLORE OTHER CARTOPAC PRE-CONFIGURED WORKFLOWS

In addition to IRM, these purpose-built CartoPac solutions help you easily and efficiently manage maintenance and compliance requirements throughout your asset lifecycle.
