

---

Please see the chart on the following pages to determine if your product is approaching its End of Life (EOL) and, if so, which product best replaces it. All dates are subject to change.

To learn more about how to migrate products that are approaching EOL, please contact [Sales](#).

**LDOC = Last Date of Calibration**

Last Date of Calibration marks when the product will no longer be eligible for calibration service.

**LDOR = Last Date of Repair**

Last Date of Repair marks the time at which the product will no longer be eligible for repair. This date can change depending on component obsolescence. Beyond this date, RMA for a product can be fulfilled by replacement with a comparable product, if available. For software products, the Last Date of Repair (LDOR) is the last date of active development of the software, unless otherwise communicated.

**EOL = End of Life**

End of Life means the date when all support will end for a product.
