Enterprise Pipeline Compliance Solutions

Digital Pipeline Asset Management

Transform your data collection.

CartoPac is an enterprise mobile GIS platform delivering the most accurate, complete field data to support your pipeline asset digital transformation and integrity management objectives.

- ✓ Safely manage all pipeline assets within the right-of-way throughout their lifecycle.
- ✓ Maintain a highly accurate digital twin.

Gas Distribution

Leak Detection
& Repair

Pipeline Inspection,
Repair & Maintenance

CartoPac sets the standard for linear asset traceability and management, combining rules-based mobile forms, high-accuracy GNSS positioning, and configurable back-office review and approval.

EASY TO CONFIGURE & USE

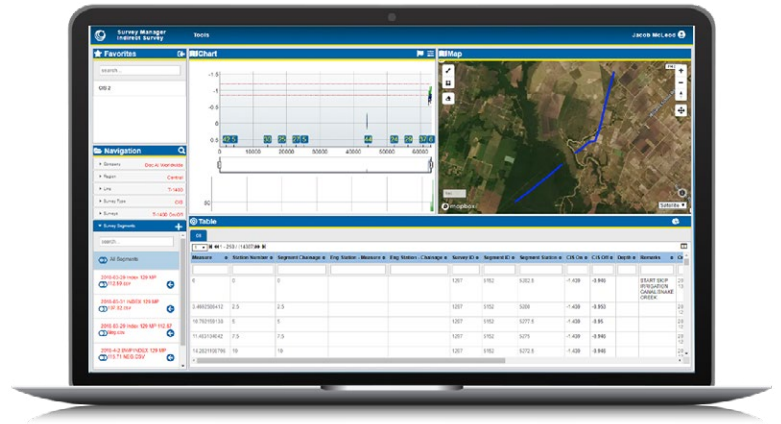

- ✓ Configurable workflows eliminate the need for costly development.
- ✓ Robust tools leverage decades of industry best practice.
- ✓ Works the way you do in the field.

YOUR TRUSTED DATA PARTNER

- ✓ We support you every step of the way to ensure your data is traceable, verifiable, and complete.
- ✓ Integrations deliver your data where it needs to go, including enterprise systems of record such as GIS, Maximo, and SAP.

Pipeline Compliance Software

Manage your corrosion program with one integrated system.

- ✓ Real Time Compliance
- ✓ Pre-built & Customizable Reporting
- ✓ Field Data Collection & Third Party System Integration

Pipeline Compliance Software (PCS) offers enterprise management of gathering, liquid products, and distribution pipeline assets. PCS is built with critical PHMSA and DOT regulatory compliance requirements to meet and maintain expanding regulations such as the Mega Rule.

FOCUS-SPECIFIC MODULES

- Cathodic Protection
- Leak Survey
- Atmospheric Corrosion
- Internal Corrosion
- ECDA
- Valve Inspections

PCS Survey Manager

PCS Survey Manager streamlines business decisions with easy visualization and validation of survey results. Enhance field surveys with a map-based view; sync annual, periodic, and indirect survey data wirelessly from field to office; and track survey statuses in real time. Manage Close Interval and DCVG surveys efficiently, overlay multiple survey types for deeper insights, and optimize the survey process from start to finish.

PCS Survey Manager is available on any device, anywhere, as long as you have an active internet connection.

PCS CLOUD-BASED HOSTING SERVICES

- ✓ Dedicated IT and platform support
- ✓ Access PCS securely from a browser any time
- ✓ Automatic updates with each PCS release
- ✓ Single sign-on (SSO) options available

Remote Monitoring

Industry-leading surge protection and an unrivaled warranty make Bullhorn remote monitoring units the proven choice in remote monitoring.

BULLHORN RM5 RECTIFIER REMOTE MONITOR

Rectifier Remote Monitors

Communications	Cellular or Satellite
Typical Measurements	<ul style="list-style-type: none"> ✓ Rectifier Volts ✓ Rectifier Amps ✓ Pipe-to-Soil ✓ Instant Off
Surge Rating	Up to 30 kV
Warranty	Comprehensive 3 Year
Easy management and configuration via Bullhorn Web	

**INNOVATION OF THE YEAR
AWARD WINNER**

REL2510 SOLID-STATE RELAY

Triton Test Stations

Ensure the effectiveness of cathodic protection systems with American Innovations' Triton® Test Stations.

Compatible with all Bullhorn test point remote monitors.

Test Point Remote Monitors

Communications	Cellular or Satellite
Typical Measurements	<ul style="list-style-type: none"> ✓ Pipe-to-Soil ✓ Bond Negatives ✓ Drain Current ✓ IR-Free Instant Off ✓ AC/DC Current Density
Installation	Mobile Application Enabled

Easy management and configuration via Bullhorn Web

BULLHORN RM5 TEST POINT REMOTE MONITOR

Field Data Collection

PCS™
Field Integration

Get rugged field data collection hardware and software to solve corrosion control challenges.

DVM2130 DIGITAL VOLTMETER

A purpose-built, rugged digital voltmeter that seamlessly integrates with our field data collection mobile app, PCS Field Data Collector.

PCS™
Field Data Collector

Perform annual, periodic, DCVG, and close interval surveys and validate inspection data in real time—on Android, iOS and Windows.

MESA FIELD DATA COLLECTION TABLET

PCS Wireless Sync

GO WIRELESS TO MANAGE YOUR SURVEYS

- ✓ Send and receive surveys wirelessly to and from your field data collection hardware
- ✓ Eliminate manual file transfers
- ✓ Visualize, manage, and monitor your surveys in real time
- ✓ Plug and play with all major mobile app distribution platforms (Google Play, iOS App Store, and Windows)

Proven compliance solutions. Relentless service.

American Innovations is the leading provider of field data collection, remote monitoring, and pipeline compliance for the oil and gas industry. We deliver a complete suite of hardware and software that allows corrosion professionals to collect the right data, at the right time, in the right location for their compliance needs. From the field to the office through a secure cloud, American Innovations is there.
